# Monthly Sales & Profit Trend

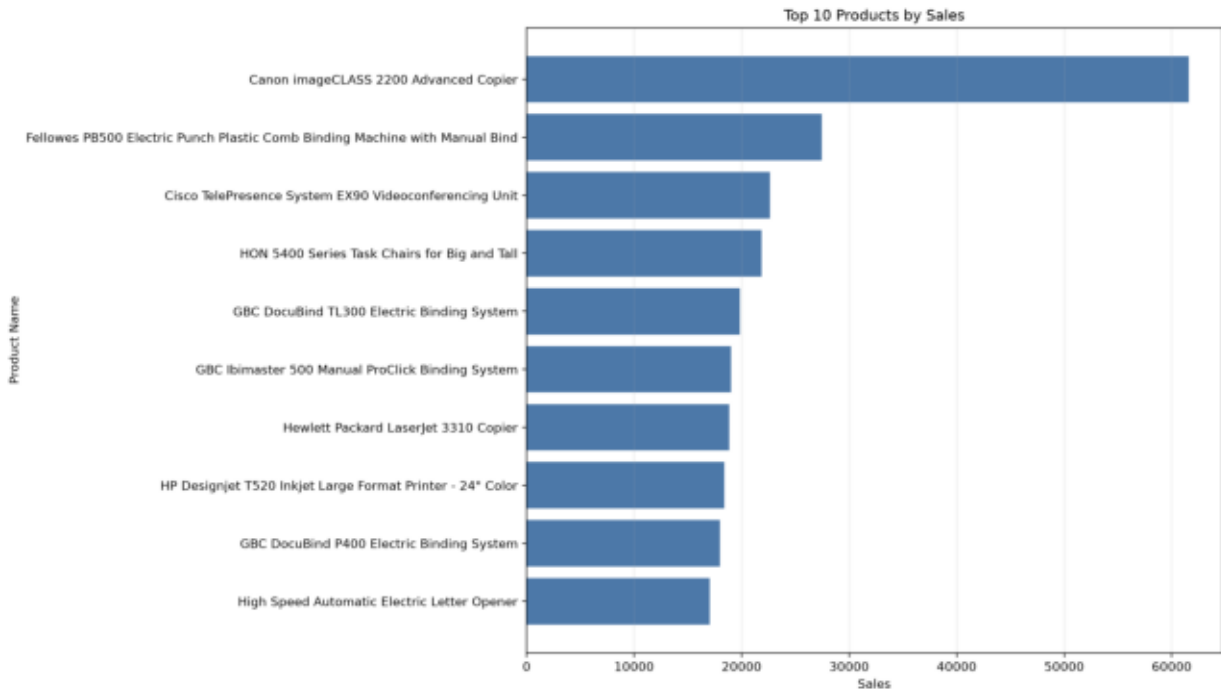

# Region Performance

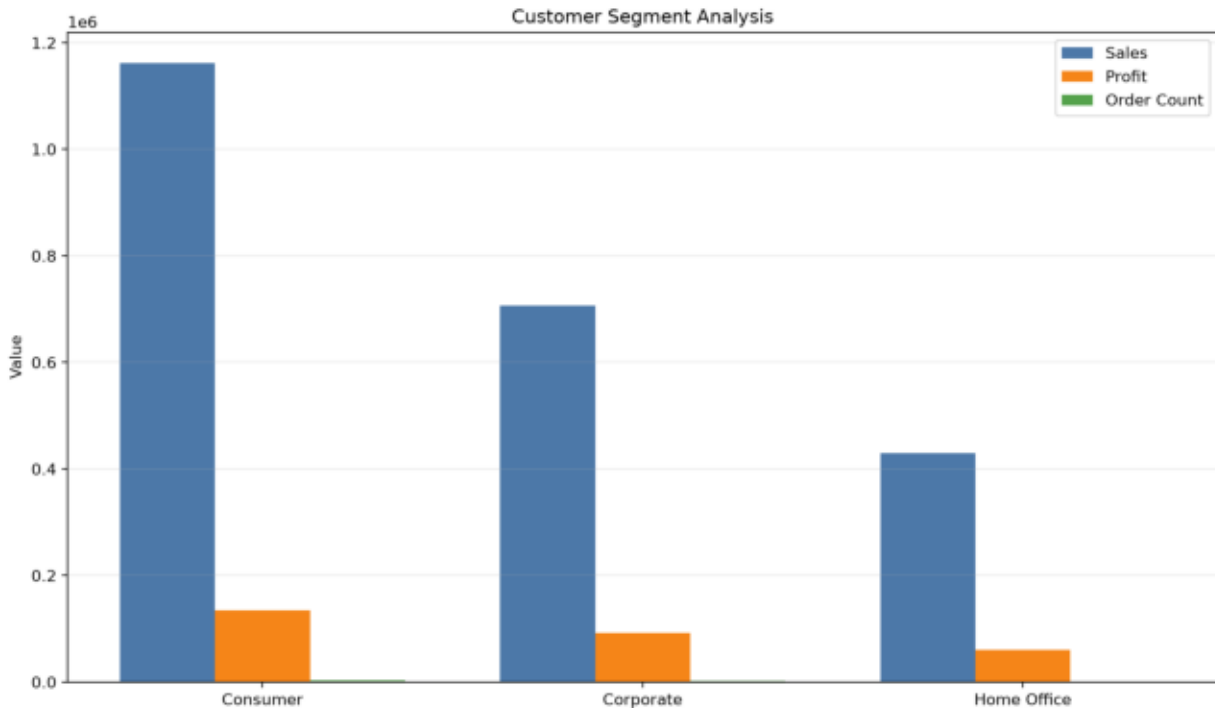

# Category & Sub-Category Breakdown

# Top 10 Products by Sales

# Customer Segment Analysis

# Key Insights

1. West region leads in both sales (725K) *and* profit (108K).  
Central region has the worst profit margin at just 7.8% despite being second highest in sales — indicating high discounting.
2. Consumer segment contributes 50%+ of total revenue (\$1.16M), making it the most valuable customer group to retain and grow.
3. Furniture - Tables is a loss-making sub-category despite \$206K in sales. Aggressive discounting is likely eroding all margins.
4. Technology has the strongest profit margins — Copiers generate 56K *profit* on 150K sales (~37% margin), the best in the dataset.
5. Sales show a clear upward trend from 2014 to 2017 with consistent November–December spikes every year, confirming strong seasonality.
